Bulletin #5 of 2021. July 22, 2021

CHANGE TO PRODUCT BULLETIN

P/N 540-105 Split Ring Now P/N 540-546 Split Ring, Stainless Steel

Products Affected: P/N 540-105 Split Ring

The split ring, that is part of several neck ring assemblies, is now made of stainless steel. The previous material was chromed brass. The P/N 540-546 stainless steel split ring is the same split ring that is used in the stainless steel neck ring assemblies. The stainless steel split rings will be used to complete the neck ring assembly as soon as our stock of the chromed brass split rings runs out. The stainless steel split ring will also be available as a spare.

Any old stock of the chromed brass split rings can be used without issue. Due to the material change of the components, the chromed brass split rings will no longer be available for purchase.

This was purely a business decision. It was not based on quality, performance, or any "safety" factors whatsoever having to do with the chromed brass split rings.

There will be no exchanges offered.

Please contact your authorized KMDSI dealer or e-mail sales@kirbymorgan.com for more information.
