Bulletin #2 of 2024. January 8, 2024

CHANGE TO PRODUCT BULLETIN

**P/N 815-045 Communications Junction Module Assembly
has been updated with an improved earphone design**

Products Affected: P/N 500-800 Surface Supplied MOD-1, P/N 805-225 Surface Supplied Pod, 815-045 Communications Junction Module Assembly

The P/N 815-045 Communications Junction Module Assembly has been updated with an improved earphone design. Internal components are greatly improved as well as improvements to the outer housing. The housing now provides a positive grip to make removal from the earphone pockets easier and helps remove unwanted stress from being applied to the wires when being removed. The earphone housings are molded from a high impact, high visibility plastic.

Previous earphone design, left, and current earphone design, right.

Please contact your authorized KMDSI dealer or e-mail sales@kirbymorgan.com for more information.
