**Bulletin #11 of 2024. November 19, 2024**

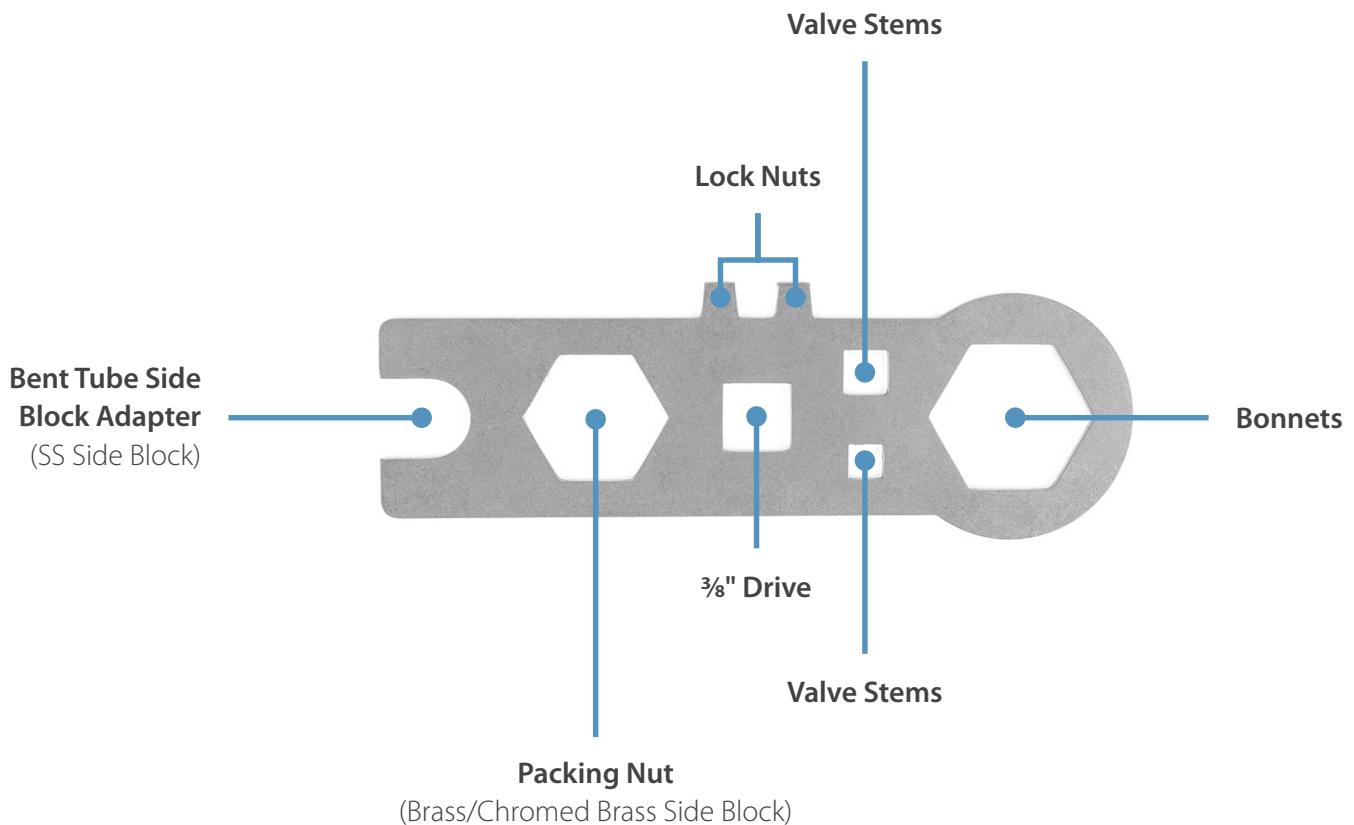

## **CHANGE TO PRODUCT BULLETIN**

**P/N 540-552 Side Block Wrench Now Has New Features**

**Products Affected:** P/N 540-552 Side Block Wrench

Please take note of the following information:

The P/N 540-552 Side Block Wrench has been modified with additional square holes that fit each of the squares at the top of the Steady Flow and EGS valve stems. It also features two hexagon openings for both Steady Flow and EGS bonnets, "Screwdriver Teeth" for installing the Steady Flow & EGS Knobs, and a center square to attach a  $\frac{3}{8}$ " driver. This allows it to be used with a torque wrench for the Bent Tube Side Block Adapter.

There are no changes to the part number or price at this time, and exchanges will not be offered.

Please contact your authorized KMDSI dealer or e-mail [sales@kirbymorgan.com](mailto:sales@kirbymorgan.com) for more information.
