Regulator Conversion Kit for SuperLite-27, Part#525-763

Divers who wish to upgrade the performance of their SuperLite-27 can now do so with the Regulator Conversion Kit, Part #525-763. The kit provides all of the parts and instructions needed to install the stainless steel SuperFlow-450 regulator on the SuperLite-27.

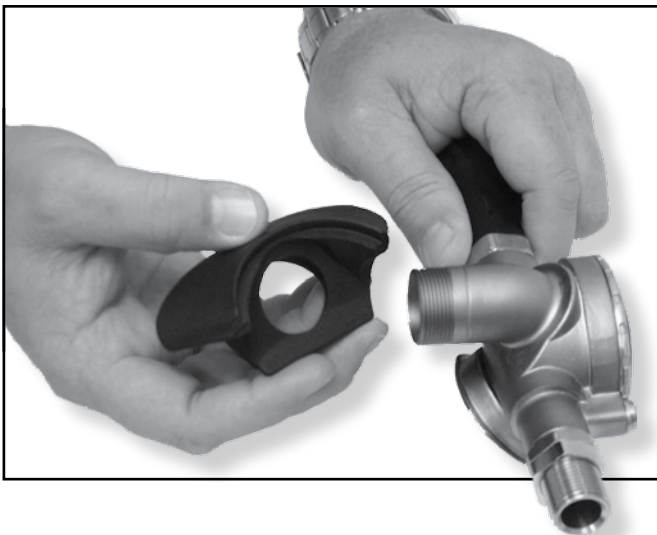

The SuperFlow-450 regulator is a high-performance regulator. It provides the following features and benefits:

- Compact design
- Low-profile
- All stainless steel construction
- High-performance breathing characteristics
- Near identical balance characteristics for helmet compared to helmet equipped with SuperFlow-350

The conversion from the SuperFlow-350 to SuperFlow-450 is quick and easy. It requires a minimum number of tools and can be performed by any trained Kirby Morgan helmet technician.

IMPORTANT NOTE: This kit is only for the SuperLite-27. It will not work with other Kirby Morgan helmets.

For more information, contact the sales department at Kirby Morgan Dive Systems, Inc.

The 525-763 Conversion Kit includes the regulator assembly, a rubber spacer, three o-rings, and a tie wrap.
